FIRM OVERVIEW

Mars Glass Company is a commercial glass and glazing subcontractor serving general contractors throughout the San Francisco Bay Area. We self-perform storefronts, entrances, curtain-wall infill, and interior glazing — delivering CSI Division 08 scope on schedule, on budget, and to specification.

Backed by installers with 100+ years of combined field experience and in-house capacity to move and set oversized glass, we integrate cleanly into GC schedules and QA/QC requirements on both public and private projects.
